Education

Govt Engineering College — Nargund, Karnataka
B.E.– Artificial Intelligence and Data Science (CGPA: 7.8) — *Sep. 2022– May 2026*

Sri Annadaneswara Pre University College — Gajendragad, Karnataka
Science-PCMCs(Per-71.5) — *May. 2018 — April 2020*

Experience

Data Science Job Simulation Virtual Internship -BCG X Company
March - 2025 — Remote

- Completed a customer churn analysis simulation for XYZ Analytics, demonstrating advanced data analytics skills, identifying essential client data and outlining a strategic investigation approach.
- Conducted efficient data analysis using Python, including Pandas and NumPy. Employed data visualization techniques for insightful trend interpretation.
- Completed the engineering and optimization of a random forest model, achieving an 85Completed a concise executive summary for the Associate Director, delivering actionable insights for informed decision-making based on the analysis

Data Analytics Intern - Labmentix
Oct 2025– Mar 2026 — Remote

- Collected, cleaned, and analyzed large datasets using Python (Pandas, NumPy) and SQL to generate actionable business insights.
- Developed interactive dashboards and visual reports in Power BI / Tableau, improving data accessibility and decision-making.
- Performed exploratory data analysis (EDA) to identify patterns, trends, and anomalies in key performance metrics.
- Analytical processes and presented findings to senior analysts and stakeholders through presentations and reports.
- Forecasting models using machine learning (e.g., regression, time series) to predict sales, demand, or performance trends.

Projects

Smart Agri Vision | *Python,HTML,CSS, React,ML,DL,* — May 2025– Present

- Developed a Crop Fertilizer Recommendation System using Decision Tree Classifier to predict optimal crops and nutrient solutions based on environmental inputs.
- Built and deployed a responsive Streamlit web application, enabling real-time predictions and user-friendly interaction.
- Applied data preprocessing, model training, and label mapping techniques to achieve 98 percent accuracy in crop prediction
- Integrated sustainable farming practices through AI to support green skill development and responsible agri-tech innovations

Plant Disease Analysis | *HTML,CSS,JS,ML,DL,CNN* — Oct 2025

- Designed and trained a Convolutional Neural Network (CNN) model for accurate plant leaf disease detection using image datasets.
- Built a custom AI engine to identify plant diseases and suggest appropriate fertilizers, pesticides, and treatment supplement
- Connected ML/DL models to the dashboard backend for seamless disease prediction from uploaded plant images.

Technical Skills

Languages: Python,Java, Python, C/C++, SQL, HTML/CSS,
Data Analytics and Visualization Tools:Power BI, Excel, Jupyter Notebook, Matplotlib, Seaborn,numpy,pandas
Frameworks: Flask
Developer Tools: Git, VS Code, Visual Studio, PyCharm, IntelliJ
Data Science Skills:ML ,DL ,Data Analytics ,EDA
